Slim, low profile heads for better visability and manoeuvrability

DYNAMIC Water Cooling Sectioning Handpiece & Burrs

- Sectioning is demanding work.
- The burrs need increased support from the head bearings, yet the head must be very low profile for manoeuvrability and visibility.
- The new DYNAMIC sectioning handpiece delivers both. Built for durability, with targeted water cooling to reduce thermal heat and dust.
- Use with our range of precision burrs, developed for sectioning, coronectomies, and diastema widening, available in a range of lengths and styles.

See our website for the full range of burrs.
